# CORRIDOR PRODUCTIVITY PACK

**The Corridor Productivity Pack** helps you bring your Corridor modeling to the next level and allows for full control on cross sections and quantities, and works where out-of-box solutions fall short. The CPP is a content pack for AutoCAD Civil 3D Corridors and includes Powerful Subassemblies made from Subassembly Composer that is ready for import into Civil 3D. The CPP includes both Imperial and Metric versions, as well as MNDOT-specific Subassemblies.

## Features

- Built to realistic geometrics
- Full Targeting capability
- Editable in Subassembly Composer
- Customizable codes for detailed cross sections
- Detailed Help files
- Customizable Codes for quantity takeoff

## Source of ROI - Return on Investment Realized

- |                                       |   |
|---------------------------------------|---|
| 1. Multi Layered Lane                 | 7. Sidewalk with Boulevard From ROW     |
| 2. Multi Layered Lane with Mark Point | 8. Link Slope to Surface                |
| 3. General Curb                       | 9. Link Width and Slope                 |
| 4. MNDOT Curb                         | 10. Link Slope with Vertical Deflection |
| 5. MNDOT Curb with Sidewalk           | 11. Link Slope to Elevation             |
| 6. Sidewalk with Boulevard            | 12. Link to Mark Point                  |
