SUPERDOOR CONFIGURATOR

SuperDoor Configurator makes creating high quality, consistent door families and placing them in your project fast and easy!

SuperDoor Configurator leverages the advanced parametric capabilities of Autodesk Revit software, and empowers users to generate virtually infinite variations of panel and frame configurations with Revit.

***Compatible with Revit 2016, 2017, 2018, and 2019.**

Common Challenges

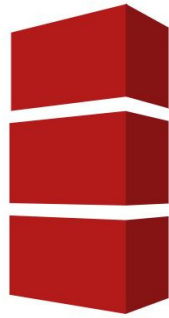

- Door libraries take a lot of time to create
- Out of Box and downloaded content has limited flexibility
- Choosing between quality and detail vs size and performance
- Standard insertion and placement tools are not optimal

Solution - Content Management

- Generate dozens of ready-to-use assemblies
- Quick selection from a variety of sizes, types and hardware
- Configurator Door can be placed directly using the interface or loaded into the project for later use
- Build a complete comprehensive Door library without adding complexity

Source of ROI - Return on Investment Realized

- Greatly reduce management of content
- Increased accuracy and error reduction emphasized by pre-created, standardized door families.
- Manage and maintain the library with dedicated SuperDoor Admin Tool
- Fully supported by CTC staff
